

Dear Hiring Manager at Point72 Asset Management, I am excited to apply for the Data Engineer position at Point72 Asset Management, where I can utilize my technical skills and experience to design, build, and maintain large-scale data systems. With a strong background in computer science and software engineering, I am confident in my ability to collaborate with data scientists and stakeholders to identify and prioritize project requirements. My experience with languages such as Java, Python, and Scala, as well as big data technologies like Hadoop, Spark, and NoSQL databases, aligns with the job requirements. In my current role as an Application Developer at ThoughtWorks, I have engineered bill notifications and alerts within a distributed autopay platform using Spring Boot and Java, leveraging software design patterns to build reliable, modular components. I have also optimized API response time for Stripe transactions, implemented Amazon OAuth for user registration and authentication, and built interactive business intelligence dashboards using React and PostgreSQL for data visualization. I am impressed by Point72's commitment to fostering a positive and inclusive work environment, with a strong focus on employee development and growth. I am excited about the opportunity to work with a talented team and contribute to the company's mission. Thank you for considering my application. I look forward to discussing my qualifications further. Sincerely, Supraja Srikanth
