

Dear Hiring Manager at Palantir,

I am excited to apply for the Forward Deployed Software Engineer role at Palantir, where I can utilize my technical skills and experience to help organizations make better decisions with data. With a strong foundation in software development, data integration, and data analysis, I am confident that I would be a valuable asset to your team.

As a skilled software engineer with experience in working with various programming languages, including Python, Java, and JavaScript, I am well-equipped to work with customers to integrate their data, build data pipelines, and create data visualizations. My experience in software development has taught me the importance of strong communication and problem-solving skills, which I believe are essential for success in this role.

In my previous roles, I have demonstrated my ability to work with distributed systems, optimize API response times, and implement scalable architectures. For example, at ThoughtWorks, I engineered bill notifications and alerts within a distributed autopay platform using Spring Boot and Java, which resulted in a 30% boost in customer experience. I also optimized API response time for Stripe transactions by 150ms and implemented Amazon OAuth for user registration and authentication, reducing manual verification time by 40%.

I am particularly drawn to Palantir's mission to help organizations make better decisions with data, and I am impressed by the company's commitment to innovation, teamwork, and customer satisfaction. I am excited about the opportunity to work with a talented team of engineers and contribute to the development of cutting-edge software solutions.

In addition to my technical skills and experience, I possess excellent communication and problem-solving skills, which I believe are essential for success in this role. I am confident that my passion for software engineering, combined with my strong work ethic and ability to work well in a team, make me an ideal candidate for this position.

Thank you for considering my application. I would welcome the opportunity to discuss my qualifications further and explain in greater detail why I am the perfect fit for this role.

Sincerely,  
Supraja Srikanth
