Dear Hiring Manager at Palantir,

I am excited to apply for the Forward Deployed Software Engineer position at Palantir, where I can leverage my technical expertise and passion for data-driven insights to drive customer satisfaction. With a strong foundation in software development, data integration, and cloud computing, I am confident that my skills align with the role's requirements.

As a seasoned software engineer with experience in developing scalable and efficient systems, I am well-versed in designing and implementing data pipelines, building custom applications, and integrating data from various sources. My expertise in programming languages such as Java, Python, and JavaScript, as well as my familiarity with front-end and back-end technologies like React, Spring Boot, and Node.js, make me a strong fit for this role.

In my current role at ThoughtWorks, I have engineered bill notifications and alerts within a distributed autopay platform, leveraging software design patterns to build reliable and modular components. I have also architected a robust recurring mandate protocol, maximizing payment efficiency and diminishing payment failure rates. Additionally, I have optimized API response times, implemented Redis Pub/Sub architecture, and reduced database maintenance time by automating updates.

I am particularly drawn to Palantir's mission to help organizations make better decisions through data-driven insights. As someone who is passionate about using technology to drive positive change, I appreciate the company's commitment to innovation, teamwork, and customer satisfaction. I am excited about the opportunity to work with a talented team of engineers and contribute to the development of cutting-edge data integration and analytics platforms.

Thank you for considering my application. I would welcome the opportunity to discuss my qualifications further and explore how my skills and experience align with the requirements of this role.

Sincerely,

Supraja Srikanth
