Dear Hiring Manager at Palantir,

I am excited to apply for the Forward Deployed Software Engineer position at Palantir, where I can utilize my technical skills and experience to help organizations make better decisions by integrating, analyzing, and visualizing their data. With a strong foundation in software development, data integration, and cloud computing, I am confident that I would be an excellent fit for this role.

As a highly motivated and detail-oriented software engineer, I have a proven track record of delivering high-quality solutions that meet customer needs. My experience in working with distributed systems, microservices, and cloud-based technologies has equipped me with the skills to design and implement scalable and efficient software systems. I am excited about the opportunity to work with Palantir's enterprise data integration and analytics platforms and contribute to the company's mission of helping organizations make better decisions.

In my current role at ThoughtWorks, I have engineered bill notifications and alerts within a distributed autopay platform using Spring Boot and Java, leveraging software design patterns to build reliable and modular components. I have also architected a robust recurring mandate protocol for autopay, confirming instantaneous payments after bill production, thereby maximizing payment efficiency and diminishing payment failure rates. Additionally, I have decreased payment processing latency by 75ms by optimizing BBPS APIs and accelerated bill and biller data retrieval, enhancing performance, scalability, and customer satisfaction in real-time transactions.

I am impressed by Palantir's commitment to innovation, teamwork, and customer satisfaction, and I am excited about the opportunity to be a part of a team that values these principles. I am confident that my technical skills, experience, and passion for software development make me an ideal candidate for this role. I have attached my resume, which provides more details about my experience and skills.

Thank you for considering my application. I would welcome the opportunity to discuss my qualifications further and learn more about the team's work at Palantir.

Sincerely,

Supraja Srikanth
